

ECI Lakes Region Indicators

Community Empowerment Area Indicators	Identify the State Results Linked to the Indicator by A, B, C, D, E	Identify Source of Data for Each Indicator	Baseline Data (date and numerical value) 2000	Subsequent Year's Data				Goal (numerical value and projected timeline)	Progress Update (brief analysis of data)
				2010	2009	2008	2007		
Immunized children (children immunized at a public clinic by age 2)	A, B	Iowa Department of Public Health	Clay 92% Dickinson 94% O'Brien 84% Osceola 85% State 86%	86%	86%	91%	95%	Immunization rates will increase to 85% (ECI LR average) by 2014.	On average immunization rates in the ECI Lakes Region continue to be significantly higher than the state rate. A voluntary recall of select Hib vaccine in 12/07 resulted in a Hib shortage. The CDC provided recommendations deferring the booster dose of Hib for healthy children, impacting child immunization rates for 2008/09.
Teen births (number of births to mothers under age 20)	A, B, D	Iowa Department of Public Health	Clay 20/204 Dickinson 15/159 O'Brien 22/187 Osceola 4/73 ECI LR 10.2% State 9.9%	11/203	22/192	24/217	13/204	Teen births will decrease to 9% (ECI LR average) by 2014.	In the ECI Lakes Region, the total number of teen births remains relatively stable and below the state and baseline percentages. The BCBB nurses (one of the family support programs) discuss family planning with participating families and approximately 75% are using family planning at discharge.
Incidence of child abuse (percent of confirmed abused children ages 0-5 of total confirmed abused children ages 0-17)	B, C, D, E	Iowa Department of Human Services	Clay 53.9% Dickinson 41.3% O'Brien 42% Osceola 50% ECI LR 46.8% State 47% <i>(Baseline data is from 2003)</i>	50%	52.1%	64.7%	63%	Rate will decrease/ remain below the state rate by 2014.	The number/percent of confirmed abused children 0-5 decreased in 2010 following previous years' increases which the area DHS service supervisor attributed to increased meth use, drug exposed children, and unemployment. Increased services and supports are provided/utilized within O'Brien county. Within the Lakes ECI, 95% of participant children 0-5 in the KIDS program were not abused (FY11). The confirmed abuse was all connected to parental substance abuse.
Incidence of child abuse (rate of children per 1,000 age 0-17 who are confirmed to have been abused or neglected during the year)	B, C, D, E	Iowa Department of Human Services	Clay 17.3 Dickinson 11.1 O'Brien 4.8 Osceola 8.8 State 12.9	25.7	20.4	32.4	23.4	Rate will decrease/ remain below the state rate by 2014.	As noted above, ECI Lakes Region families are challenged daily with critical needs. We also recognize that as more families utilize services, the child abuse rates may increase as providers are mandatory reporters.
Low birth weight (percentage of live births weighing at less than 5.5 pounds at the time of birth) Addition	B	Iowa Department of Public Health	Clay 6.4% Dickinson 4.1% O'Brien 8.0% Osceola NA (confidentiality) State 7.0% <i>(Baseline data begins with 2010)</i>					ECI LR average percentage will remain below the state percentage by 2014.	This indicator has been added, effective with the FY12 Community Plan. 2010 provides baseline data with data collection beginning in FY13.
Child abuse in a child care setting Addition	C, D	Iowa Department of Human Services/ECI State Annual Report	ECI Lakes Region: NA State: 81 cases <i>(Baseline data begins with 2010)</i>					Rate will decrease by 2014.	This indicator has been added, effective with the FY12 Community Plan. 2010 provides baseline data with data collection beginning in FY13.
